Hi there,

Here is a link to my project: <http://lostonline.co.uk/>. I hope it won't be a problem that it is a fictional film, rather than a documentary!

Kind regards,
Sharifah Mian

Hi,

I think you misunderstood what I meant. I'd like my project to be on this page if it's possible:
<http://www.klynt.net/projects/>.

Project Gallery | Klynt.net<<http://www.klynt.net/projects/>>

Is there a way I can do that?

Hi Sharifah,

Thanks for your mail,

You just need to close the current project (ctrl + w or cmd + w) or directly from the menu bar File > close and you will be redirect to the gallery project

Best,

Jean-Edouard
